(b) In Progress

- (i) **Effects of Conditional Cash Transfer (CCT) on Welfare Status of Beneficiaries in Ondo State, Nigeria.**

The government of Nigeria and its development partners have sought to develop social protection instruments as a mechanism to tackle high rates of poverty and vulnerability in the country and to support development progress in both the economic and the social spheres. As such, social protection is emerging as a policy objective, with cash transfers identified at the federal level and to some extent the state level as an important instrument to achieve these goals. The consistent failure of past programmes necessitates an assessment of current attempts to solve the same age-long issue. Therefore, effects of CCT on welfare status of beneficiaries in Ondo state was assessed. Data is being collected on

- (ii) welfare status of CCT beneficiaries

Utilization of Wastewaters for Irrigation among Vegetable Producers in Ondo State, Nigeria

The gap between the supply and demand for water is reaching alarming levels and posing a threat to human existence in some parts of the world. In Nigeria problem of insufficient water and lack of good irrigation system has limited most arable crop farmers, especially vegetable farmers to cultivate only during rainy season thereby subjecting most vegetable farmers to diversification. This has contributed to the reasons vegetables take different colours, expensive and sometimes unavailable during dry season. However, some farmers depend on wastewater for irrigation. Thus utilization of wastewater for irrigation among vegetable farmers was investigated. Data collection is ongoing on utilization of wastewaters for irrigation among vegetable farmers in Ondo state.
